

Client Questionnaire

PDGuard-T4000 Online PD Monitoring System for Power Transformer

Client Information

Name	Title
Phone	Email
Company Name	Department

How can we help you?

1. Your enquiry will be used for
feasibility study
budget
bid
purchase
2. Do you have any experiences on using online PD monitoring system?
yes
no
3. Please provide the basic information of the power transformers that needs to be monitored
rated voltage quantity
4. Are the power transformer already existed or new built?
☐ already existed
☐ new built

Basic information about online PD monitoring system

1. Which kind of PD sensor do you prefer for the PD monitoring system?
UHF Drain Valve Sensor
UHF Plate Sensor
2. Where are the power transformers installed, which need to be monitored?
indoor
outdoor
3. Where the Data Acquisition Unit (DAU) will be installed?
indoor
outdoor

4. Do you need Industrial PC (Windows OS) to install the software package?

yes

no

5. What kind of communication interface do you prefer regarding the application?

ethernet (TCP/IP)

RS485 (Modbus-RTU)

6. Do you need the system communication comply with IEC 61850?

yes

no

7. Do you have any other technical requirements? If you have technical requirements, please provide "Technical Specifications" for our detailed technical assessment

8. Do you need other types of monitoring? Innovit Electric would like to provide customized solutions.

9. How long do you prefer for the delivery time?

delivery time
